WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut a 200 mm disc from 4 mm steel plate; deburr the edge.

Mark twelve lines from the centre, 30 degrees apart. These are the rib lines; the clips sit 1.5 mm to one side of each line.

On each line, offset 11.5 mm to the clip side, drill 5.5 mm at 72.5 mm from the centre for the clip bolt.

Paint the back; the front is hidden behind the petals.

Fit: the ribs' inner ends stand on its front face, each held by a rib clip; it hangs about 22 mm behind the petals.

Check: the twelve holes are on a 72.5 mm radius within 1 mm.
