WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make 24 (12 at the hub, 12 at the rim): all the same.
Cut 13 mm slices from 20 x 20 x 3 mm steel angle; deburr.
Drill one 5.5 mm hole in the middle of each leg.
At the hub: one leg on the hub plate, the other against the side of the rib, M5 bolt through each leg.
At the rim: one leg on the inside of the rim band, the other over the petal flange on the side of the rib; one M5 bolt through clip, flange, rib and the next petal's flange.
Check: a clip sits flat on both faces at once.
