WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Roll 4,440 mm of 25 x 4 mm flat bar the easy way into a ring 1,400 mm inside diameter (by hand round a ring of stakes, or by a local fabricator with rolls). Join the ends with a 100 mm strap of the same bar inside, four M5 bolts, at a rib position. Mark twelve rib positions 30 degrees apart, starting 15 degrees from the two stand-off positions, which are opposite each other. Drill: 9 mm pairs (30 mm apart) at the two stand-off positions; 6.5 mm pair (24 mm apart) at the gnomon, midway between two ribs; 5.5 mm for each rim clip; tab rivets at assembly. Check: round within 3 mm across any two diameters.
