WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make twelve from the flat pattern (petal pattern picture).

Leave the protective film on until the dish is finished.

Cut with aviation snips; drill 3 mm relief holes where folds meet.

Fold a 12 mm flange down along both long edges, a little at a time along the length, so the petal takes up a gentle curve.

Fold the two 30 mm tabs down at the outer edge.

Lay the petal on two neighbouring ribs, flanges outside the ribs; drill 3.3 mm through flange and rib every 50 mm and rivet with 3.2 mm aluminium rivets; rivet each tab to the rim band.

Never scratch the bright face; handle with clean cotton gloves.

Check: the petal edges meet over each rib with a gap of 3 to 5 mm.
