WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Bracket: 40 mm of 40 x 40 x 4 mm angle. Upright leg: two 6.5 mm holes 24 mm apart, 20 mm down. Flat leg: two 5.5 mm holes.

Target plate: 120 x 120 mm of 3 mm aluminium, painted matt white; scribe two rings, 10 and 25 mm radius, at its centre.

Pin: 8 mm steel rod 183 mm long, threaded M8 for 15 mm at one end, through a centre hole with a nut each side, square to the plate.

Fit: the bracket's upright leg on the outside of the rim band at the lowest point of the dish, the plate on the flat leg flush with the rim edge; the pin is parallel to the dish axis.

Check: an engineer's square on the plate touches the pin.
