HOW TO MAKE IT AND HOW IT FITS

Make two. Cut 686 mm of 25 x 25 x 2 mm tube; cap the ends.

Drill 8.5 mm vertically through both walls:

ring bolt 13 mm from the inner end;

bracket bolt 65 mm from the outer end.

Fit: the outer 45 mm rests on the top of the upright, flush with

its outer face; the bracket under it on the upright's inner face.

The holder ring sits on the inner ends of both arms.

Check: laid across both uprights, the arms are level within 1 mm.
