#### WHERE IT GOES

This part in colour, its neighbours in grey

#### HOW TO MAKE IT AND HOW IT FITS

Cut a flat ring from 4 mm steel plate: 348 mm inside and 408 mm outside diameter (jigsaw with a metal blade, or a cutting shop).

Two 9 mm holes on a 378 mm diameter, opposite each other.

File the inner edge smooth; paint with heat-resistant paint.

Fit: it lies on the two holder arms, one M8 bolt into each;

the cooker drops through it and hangs by its two handles.

The jacket clears the inner edge by 5 mm all round.

Check: the cooker body and jacket pass through without touching.
