WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut a strip of 25 mm aluminised blanket 96 mm wide and 1,010 mm long, foil outward; wear gloves, a dust mask and glasses.
Bind both long edges with aluminised tape.
Fit: wrap it round the canner wall from 80 mm above the base to 30 mm below the rim, butt the ends and tape the joint.
Hold it with two stainless strap clamps, 12 mm from each edge.
The lowest 80 mm of wall and the base stay bare and black.
Check: it stops below the handles and clears the ring by 5 mm.
